Administrative contact info

● Sample Information

Please provide detail information as much as possible.

Total number of samples

Type of samples

(e.g., powder, suspension, tissue, blood)

Sample description / research demand

(e.g., supernatant for ion release kinetic, impurities check in semiconductor, heavy metals in waste water)

Elements to be determined

Approximate concentration range

(e.g., Pt: 1 mg/mL; Cu 5 µg/mg)

Standard or literature digestion method

(e.g., nitric acid at 95°C overnight, aqua regia, hotblock or microwave digestion)

Sample storage

(e.g., RT, refrigerator, -20 or -80°C freezer)

Hazardous materials information

(e.g., pathogen, viurs, carcinogen, radioactive materials)

● Data Report

Concentration unit in data report

(e.g., µg/mL, ppb, wt. %)

Please note that it will take generally two weeks to share data report once you submit this form with samples.

If you have any question, please contact to Paul, chonghyun@ucla.edu
